DESCRIPTION

This launching gantry crane handles precast concrete beam placement on bridges, viaducts, expressways, and railway structures, with a 200-ton rated capacity and spans configurable between 20 and 50 metres. It runs on 380V 50Hz three-phase AC power, uses an electric trolley lifting mechanism with pendant control, and is built to work duty classifications A5 through A8. Operating temperature range is -25°C to 60°C, with maximum lifting heights available at 5 metres, 7.5 metres, or custom on request. Each unit ships as a single item with a machinery test report and video inspection provided; warranty is 1 year from the manufacturer in Henan, China. Builders24 sells, distributes, provides customs clearance services
